

# INAPRO® SW

## The One That Works

### Product Description

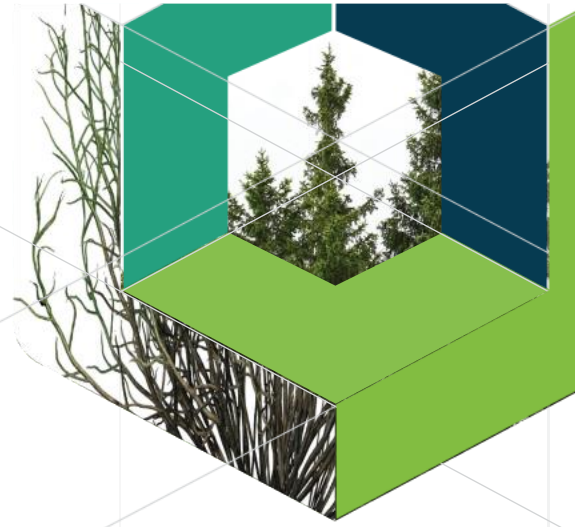

INAPRO® SW is a patent pending buffered amine oxide (BAO) soil wetter with humectant capabilities and oil formulation partners, designed for pre-emergent application to aid in increased penetration and pesticide retention in the soil column.

### Benefits and Features

- Buffered amine oxides allow for both soil wetting and soil spread
- Unique structural properties of buffered amine oxides and other oils allow for strong moisture retention and penetration
- Bio-renewable (not derived from petrochemicals)
- Fully water soluble; freeze/thaw stable
- Formulated for robust tank stability
- Fully permeates most plant bodies
- Components “generally recognized as safe” by USFDA and have low inherent toxicology

### Application Rate

0.250-1.000% v/v -or- 2 pt. to 1 gallons per 100 gallons
