DIRECTIONS FOR USE
WRS-24 concentrate Weather Resistance System. Small amounts of preservatives are utilized for in-can protection, protection of the ready-to-use coating solution or protection of the ready-to-use coating film from fungal degradation.* Once diluted WRS-24 concentrate forms a ready-to-use weather resistant wood coating solution that bonds to wood to form a breathable film.

*Mold & mildew resistance of the dry film coating.

PRODUCT CHARACTERISTICS
WRS-24 concentrate is a viscous, white, creamy liquid. When diluted, WRS-24 concentrate becomes a water-thin, milky solution.

Avoid Freezing.

USE
WRS-24 concentrate is intended for use on lumber in sawmills and millwork facilities to reduce checking and to improve the surface appearance by reducing extractive bleed. It also allows for more uniform drying of green wood and helps protect dry wood from rewetting.

MIXING INSTRUCTIONS
WRS-24 concentrate **MUST** only be used with solutions of Bazooka®, Workhorse®, Moldshield® and NP-1® Sapstain Control products and the compatible materials listed below. WRS-24 concentrate should not be added directly to the treating tank, but must be diluted first in a premix system. WRS-24 concentrate must be thoroughly agitated before introduction into the premix system. After the ready-to-use preservative solution of Bazooka®, Workhorse® or Moldshield® has been prepared, mix one gallon of WRS-24 concentrate per 65 to 200 gallons of the preservative solution. Dilution rates will be influenced by seasonal conditions, exposure during storage and transit, treating methods and wood species. If the ready-to-use water repellent preservative solution is not used for 24 hours, this solution should be agitated before use.

DISPOSAL
Triple rinse any empty drums and add rinsate to the partially filled premix tank; add the balance of water needed.

APPLICATION
Lumber should be totally immersed or sprayed with the solution to insure all surfaces are treated. In spray applications, adequate spray coverage is critical because less solution is applied to the wood by spraying than by dipping.

Mold & Mildew Resistant* Water Repellent Coating

DILUTE BEFORE USING

*Mold & mildew resistance of the dry film coating

Read Disclaimer on side panel before buying or using. If such terms are not acceptable, return at once unopened.

DANGER!

HAZARDS

- Causes severe skin burns and eye damage
- May cause an allergic skin reaction
- Causes serious eye damage
- Harmful if inhaled
- May cause genetic defects
- Suspected of causing cancer
- May damage fertility or the unborn child
- Causes damage to organs through prolonged or repeated exposure
